Martech M8 Series

The Martech M8 Series is built for intensive, long-term use in both **professional and private training** environments.

Each rack is constructed from **3 mm thick steel tubing**, providing high structural rigidity and load capacity.

The **aluminum pulleys** ensure smooth cable movement and long-lasting performance.

All components are designed for stability, precision, and safety, making the M8 Series one of the **most robust and durable strength systems** available on the market.

Martech M8 3IN1 rack - Smith machine model

COMING SOON

Martech M10 All- one rack ‘The Beast’

The Martech M10 All-in-One Rack – 120kg Stack is a powerful all-in-one home-gym unit that allows you to perform virtually every major compound and isolation exercise — from squats, bench presses, cable crossovers and pull-ups to dips and leg presses — all within one frame.

Martech M1 Series

The M1 Series is a lighter line within the Martech range — built with lighter steel frames and designed more for home gyms or semi-commercial use.

It offers a wide variety of configurations and attachments, providing great versatility at a more accessible price point.

Martech **M1+** multifunctional rack

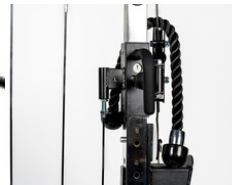

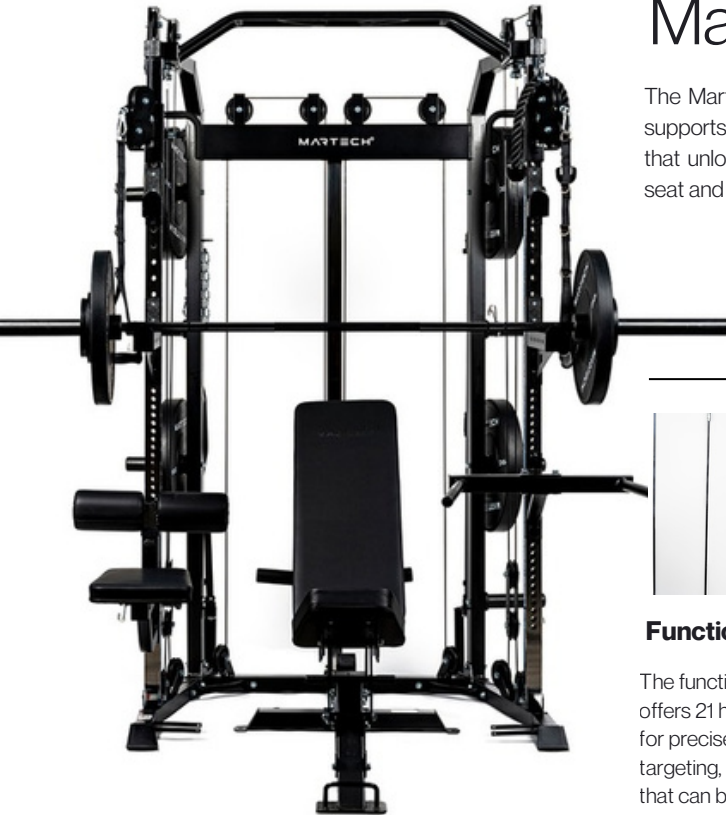

The Martech M1+ is a **compact, plate-loaded rack** and cable system designed for true free weight training

€ 999

Incl. Delivery & TVA

Martech M1+ rack

The Martech M1+ is the lighter version of the M8, built on a slimmer steel frame but still supports lifts up to 200KG—ideal for getting started, with a plate-loaded functional trainer that unlocks a wide range of exercises, especially when combined with the lat pulldown seat and dip handles.

Functional trainer

The functional trainer offers 21 height positions for precise exercise targeting, with dual pulleys that can be used together or separately for full-body cable training.

Dual pulleys

Loadable up to 90KG per side, the plate-loaded system delivers smooth and consistent resistance—perfect for chest flys, rows, curls, and more.

Attachments

Comes with two single grips, a triceps rope, and a short biceps bar. Optional lat pulldown seat and dip handles available for even more variety.

Martech **M1** power cage

€ 1150

Incl. Delivery & TVA

The Martech M1 is a compact and versatile rack designed for serious strength training. Constructed from **2.5 mm thick steel**, it offers excellent stability and durability in a small footprint of 105 cm x 155.5 cm, with a total height of 213.5 cm. Weighing 75 kg and rated for **up to 250 kg**, the M1 features a smooth **1:1 cable** system with a maximum range of 2.5 meters, perfect for a wide variety of cable exercises.

Cable station

MT - FT90

€ 2150

Incl. Delivery & TVA

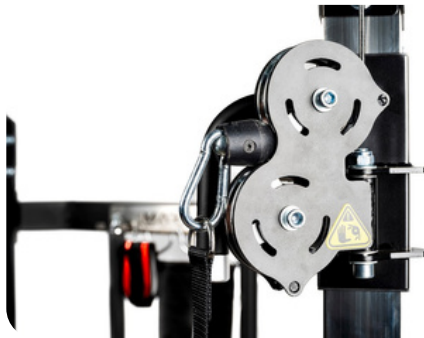

With its compact 1.7 m² footprint, the MT-FT90L is ideal for gyms, studios, and home fitness setups looking for reliable, high-performance cable training.

Cable station

MT - FT90

Straight bar, ankle strap, W-curved bar, chin-up assist band, and 2 nylon handles included.

All aluminium pulleys

The MT-FT90L is a sleek and robust functional trainer, designed for both home and semi-commercial use. Built with aluminium pulleys, 5 mm steel cables tested up to 800 kg tension, and a 2:1 pulley ratio, this machine offers exceptional durability and smooth performance.

Adjustable benches

FID2000

€ 375

Incl. Delivery & TVA

Its **full-range adjustability (flat, incline, decline)**, high load capacity, and smooth mobility make it a standout choice for both home gyms and professional settings.

Adjustable benches

FID2000

Sturdy and versatile FID bench with **7 backrest and 2 seat positions**, ranging from -15° to 85° . Built from 2.5 mm thick steel with a max load of **320 kg**. Compact, easy to move, and perfect for home or semi-commercial use.

Adjustable benches

HD2000

€ 475

Incl. Delivery & TVA

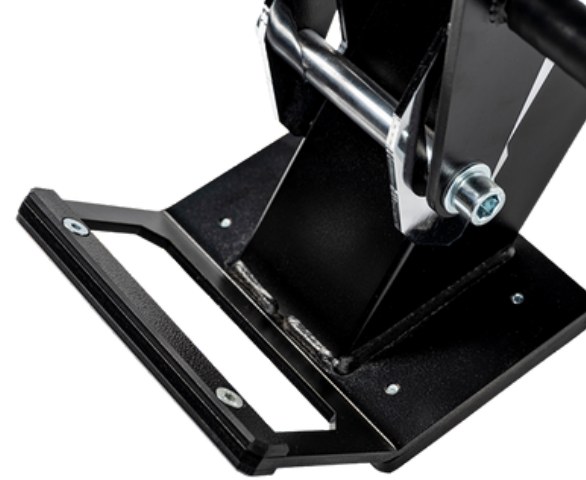

Compared to the FID2000, the MT-HD2000 is more robust and stable, with a slightly **more compact back cushion** and no decline option—ideal for heavier, flat and incline-focused training.

Adjustable benches

HD2000

Engineered for serious training, this bench features a reinforced 75 × 75 × 2.5 mm steel frame, **9 backrest positions (0° to 90°)**, and **3 seat angles (0°, 15°, 30°)** for full training versatility.

With 70 mm thick padding, a max load capacity of **390 kg**, and smooth transport via handle and wheels, the HD Bench delivers durability, comfort, and mobility.

Adjustable benches **HD3000**

€ 525

Incl. Delivery & TVA

The Martech HD30000 Military Bench combines commercial-grade strength with smart, space-saving design.

Adjustable benches

HD3000

Built from **3mm thick steel** and rated for up to **450kg**, this bench offers **9 backrest and 3 seat positions**, a 30cm wide backrest for full support, and **vertical storage** to save space when not in use. Ideal for intense, versatile training at home or in semi-commercial settings.

The image shows the exterior of a Martech Fitness Depot store. The building has a modern design with grey vertical panels and a large glass entrance. Above the glass doors is a white sign with the word 'MARTECH' in black capital letters. Through the glass, a black power rack and other gym equipment are visible inside. The ground in front of the store is paved with light-colored interlocking bricks.
